U.S. Domestic First Class Surface Postal Card and Post Cards

I have been looking at the rates of postal cards and post cards since early 2010. It has been interesting to learn about the different rates during different time periods. Finding an early June, 1873 use of the 1873 postal card took a long time. Also, finding a card for the September 14, 1975 -> December 31, 1975 7 cent rate was extremely hard to find and it wasn't till I found that item that I knew the exhibit could be done. Some of the remaining items are very hard to find. At this point, I do not even have all of the items I need and will hopefully find the last few items needed to finish the exhibit. ☺ I have been buying from EBay and have gone to 3 stamp shows over the last year and a half looking for items. There are a few stamp shows in the next few months and I will hopefully find the hard to find items.
